Bangalore, India - Seeking relocation · Open to visa sponsorship

Full-stack AI/ML engineer with 7+ years of experience building scalable web applications and AI-native systems. Passionate about performance optimization, AI/ML integration, and frontend architecture. Experienced in delivering complex enterprise solutions using React, TypeScript, Python, Node.js, AWS, and microfrontend patterns. Proven track record of technical leadership, mentoring, and driving accessibility, usability, and AI-powered product innovation.

WORK EXPERIENCES

JPMORGAN CHASE & CO.

SEPT 2025 – PRESENT

Software Engineer III (SDE 3) | Associate Vice President — Investment Technology

Sept 2025 – Present

React | Python | AWS | MCP | AI/ML | TypeScript | Agentic Systems | Design Systems | Google ADK | Langchain

- Working on **Connect OS** under the Asset & Wealth Management division — an internal platform powering AI-native tooling serving **10,000+ developers', designers' and advisors'** productivity at JPMC scale.
- Architected and built **MCP servers** for the design system and toolkit, enabling LLM-native access using RAG to component APIs, design tokens, and usage guidelines — **reducing time to development and migration from months to weeks ~70% decrease**.
- Created **Connect Studio** — an AI-native rapid prototyping platform supporting multiple personas and workflows including design-to-code, story-to-code, and Jira-to-code — **reducing time to showcase and review from days to seconds ~95%+ decrease**.
- Building AI-native systems that integrate LLMs deeply into engineering, advisors and designer workflows, bridging the gap between AI capabilities and real-world product delivery.
- Designed and operated multi-region AWS infrastructure for Connect OS serving **10,000+ internal users** — spanning Bedrock, ECS, EFS, S3, and CloudWatch observability with zero-downtime deployment pipelines.

AURIGO SOFTWARE TECHNOLOGIES

AUG 2019 – AUG 2025

Software Engineer — Senior Software Engineer

Aug 2019 – Aug 2025

React | TypeScript | JavaScript | .NETCore | C# | ASP.NET | AWS | Microfrontends | Design Systems | LLMs | AI/ML | RAG | Accessibility | PostgreSQL | Docker | Redis | jQuery | SCSS

- Led frontend architecture for multiple product suites (Essentials 2.0, Plan 2.0, Lumina GPT, Workflow); designed core application platform and in-house design system library that became foundation for all subsequent Aurigo products.
- Built **drag-and-drop Workflow Builder** microservice with real-time notifications using Webhooks and SQS, serving **1000+ concurrent users** with <100ms latency across complex business process flows.
- Contributed to **Lumina AI**, Aurigo's flagship AI-powered product integrating LLMs with AWS SageMaker into enterprise workflows; supported scalable microservices architecture ensuring backwards compatible agentic features.
- Pioneered **ADA/WCAG compliance initiative** for Masterworks Cloud achieving **85% accessibility** adherence, recognized in [Aurigo's press release](#); mentored **5+ external vendor teams** on best practices.
- Delivered engineering estimates with **~95% accuracy**; mentored **10+ developers** across multiple deliverables; achieved **~80% performance improvement** (load times <300ms from 2000+ms) through complete legacy web application revamp.
- Executed third-party tool development and internal utilities to streamline product adoption by solution engineers and clients across Aurigo's construction technology portfolio.

HCL TECHNOLOGIES

JUN 2018 – DEC 2018

Internship Trainee — Products & Platforms Division

Jun 2018 – Dec 2018

Java | Jenkins | Flask | Python | React | GitHub

- Built a Java application to migrate and manage projects between CI servers (IBM BuildForge and Jenkins), enabling bulk import/export of **10,000+ projects** across multiple engineering teams.
- Developed a web application to manage and audit unauthorised access on GitHub@HCL.
- Created a React + Flask dashboard for managers and team leads to monitor multiple application statuses simultaneously — saving **6,000+ person-hours** over 3 months.

SKILLS

AI & Machine Learning

Python · AI/ML Engineering
LLM & ML Integration · RAG
MCP Servers · Agentic Systems
Agentic Coding · Neural Networks
TensorFlow · TensorFlow.js · n8n
AI-native System Design
Google Agent Development Kit (ADK)

Frontend

React · TypeScript · JavaScript
Webpack · Vite · NextJS
Microfrontend Architecture
Design Systems · HTML5 · CSS · SCSS
jQuery · Storybook

Backend & Data

Node.js · C# · Java · Python
Flask · PostgreSQL · SQLServer
Redis · MongoDB · ASP.NET
.NETCore · REST APIs

Cloud & DevOps

AWS (Bedrock · ECS · EFS · S3
SageMaker · SQS · CloudWatch
CloudFront) · Azure DevOps
Docker · Deployment Pipelines · CI/CD

Professional

Technical leadership
Engineering estimation
Mentoring · Agile delivery
Strategic problem-solving
Cross-functional collaboration
Effective communication

EDUCATION

Bachelor of Engineering

Electrical & Electronics Engineering
BITS, Pilani · Aug 2015 – Jun 2019

Minor in Finance

BITS, Pilani · Aug 2015 – Jun 2019

LANGUAGES

English (Professional)
Hindi (Professional)
Odia (Native)
German (Basic - A1)

INTERESTS

Traveling
Kayaking
Surfing
Driving
